ABSTRACT

INTRODUCTION AND PURPOSE : The Performance Enhancement Attitude Scale –PEAS, which will be used in this research, finally created with Petrocz(2002)'s works by 17-6 Likert type form and gained to the literature. The main goal is; Performance Enhancement Attitude Scale which is improved by Petrocz is preliminary for adapting to the volleyball players. Gaining the scale to the Turkish literature which will be used to increase the performance attitude of the volleyball players in Turkey, will have beneficial consequences.

METHOD: The Performance Enhancement Attitude Scale consists of 17 items according to the six assessment stage of proceeding. In the progress of translating the scale to Turkish, there has not been added a new expression, nothing has been removed and the original scale is completely holded.

RESULTS: Three experts on linguistics has individually translated the Scale into Turkish. These people who are experts on their own field came together, debated over every problematical statements. After they built consensus the Turkish draft of the Scale has obtained. After checking the draft and agueing the problematical statements, two experts working on Sports science made a common consensus and they generated the last draft. Later on this draft translated from Turkish to English form an expert who made his postgraduate in a foreign country, working on psychology and has a language sufficiency. Translated scale by taking into account of both expert group's evaluation is compared with the original Scale and extreme similarities observed.

DISCUSSION AND CONCLUSION: Knowing that there is no problem on understandability of the Scale, preliminary show the scale can be used.

Keywords: Volleyball, Performance Enhancement, Attitude, Doping, Sport
